## Volunteer Intern Program

### **Web Site Assistants Sought**

***Work from Home !***

The Pacific Association of USA Track & Field (PA/USATF) is immediately seeking interns and experienced Webmasters to bolster our communications and media outreach efforts to local and national media, our members, and to the general track and field and long distance running community.

**Web Site Assistants** work under the direction of the PA/USATF Communications Manager and Communications Committee Chair, and work with our current volunteer Webmasters, to build and maintain our web site. This entails (depending on skill level) designing, implementing, and maintaining web pages which contain a wide variety of content. Applicants should have a working knowledge of—or a strong desire to learn—web development software. A working knowledge of HTML will also give you a head start.

You will help us deliver unparalleled online stories, profiles and interviews, press and wire releases, visual images, and “hot” items about the events and personalities in our sport. Internships are unpaid, volunteer positions. You will have an opportunity, however, to participate in an environment that produces one of the fastest growing web stops in our sport.

USA Track & Field (USATF) is the National Governing Body for track and field, long-distance running and race walking in the United States. The Pacific Association is a member association of USA Track & Field.

**For immediate consideration, contact:**

**Mark Winitz**
